LOW-CODE APPLICATION · 3RD YEAR CSE

CodeQuest

LeetCode Progress Tracker

Built with [low-code platform]. Track every solve, keep the streak.

[NITHYA SHREE S]
[240701367]

THE PROBLEM

LeetCode progress is scattered

No single view

Solved counts, difficulty split and streaks sit on different pages.

No motivation loop

Without goals or rewards, consistency fades after the first few weeks.

Hard to review

Weak topics and revision lists end up in notes or spreadsheets.

OBJECTIVES

What CodeQuest sets out to do

01

Bring solved counts, difficulty split and topics into one dashboard.

02

Keep daily streaks and goals visible at all times.

03

Turn practice into a quest with XP, levels and badges.

04

Point out weak topics so revision is targeted.

OUR SOLUTION

CodeQuest turns LeetCode practice into a quest, built with low-code.

Drag-and-drop screens

Built-in data tables

Ready-made charts

HOW IT WORKS

From username to dashboard

1

Input form

User enters a LeetCode handle.

2

Connector

An API connector pulls profile data.

3

Workflow

Rules score XP, streaks and goals.

4

Dashboard

Chart components show the results.

ARCHITECTURE

Three layers, one flow

LAYER 1

Screens

- Input form
- Dashboard pages
- Chart components

LAYER 2

Workflows

- Fetch LeetCode data
- Score XP and streaks
- Award badges

LAYER 3

Data

- API connector
- Built-in data tables
- Users, solves, goals

PLATFORM

Low-code stack

Layer	Tool	Purpose
Platform	[Low-code platform]	Screens, logic and hosting
Data store	Built-in data tables	Users, solves, goals and XP
Data source	LeetCode profile data via API connector	Solved counts and activity
Charts	Built-in chart components	Difficulty and topic views
Custom logic	Formulas or small scripts	XP, streak and level rules

KEY FEATURES

Everything in one dashboard

Progress dashboard

Total solved and recent activity at a glance.

Difficulty split

Easy, Medium and Hard counts in one chart.

Topic coverage

See which topics you practise most and least.

Daily streak

Track consecutive days of practice.

Goal setting

Set weekly targets and watch them fill.

Revision list

Mark problems to revisit later.

THE QUEST LAYER

Every solve earns XP

10 XP
Easy problem

25 XP
Medium problem

50 XP
Hard problem

Levels rise as total XP grows.

Badges unlock at streak and solve milestones.

Sample scoring values · adjust to match CodeQuest

DEMO

See CodeQuest in action

1. Enter a LeetCode username
2. Open the progress dashboard
3. Set a goal and check badges

[Insert dashboard screenshot]

FUTURE SCOPE

What comes next

Friends leaderboard

Compare streaks and XP with classmates.

Contest tracking

Chart rating changes after each contest.

Smart suggestions

Recommend problems from your weak topics.

Mobile app

Install on a phone for daily check-ins.

CONCLUSION

Key takeaways

One view

A single dashboard replaces scattered stats.

Steady habit

Streaks, XP and badges keep practice consistent.

Focused revision

Weak-topic insight shows where to practise next.

Thank you
